DIVYESH KOLLI

Cloud Computing Student | Backend & Distributed Systems | Cloud / Platform Engineering

Chennai, India | +91 99669 68300 | kolli.divyesh@gmail.com
Portfolio: divyeshkolli.fun | GitHub: github.com/divyesh8 | LinkedIn: linkedin.com/in/divyesh-kolli-690b0a102

EDUCATION

SRM Institute of Science and Technology
B.Tech, Computer Science and Engineering - Cloud Computing
2025-2029 | Kattankulathur, Chennai

Delhi Public School, Visakhapatnam
Higher Secondary Education

TECHNICAL SKILLS

Languages
Java, Python, JavaScript, TypeScript, SQL

Frontend
React, Next.js, Tailwind CSS

Backend & APIs
FastAPI, Node.js, REST APIs, WebSockets

Databases
PostgreSQL, Supabase, Neon, Prisma

Cloud & Systems
AWS fundamentals, Linux, Docker, Docker Compose, TCP/IP, WebRTC

Observability & Tools
Prometheus, OpenTelemetry, Git, GitHub, Vercel

LANGUAGES

Telugu - Native
English - Professional
Hindi - Fluent

PROFESSIONAL SUMMARY

Cloud Computing undergraduate at SRM Institute of Science and Technology (2025-2029) with hands-on work in distributed systems, backend engineering and observability. Built a Dockerized service-reliability platform with Prometheus and OpenTelemetry, a Redis-protocol Java data store with crash recovery and replication, and deterministic Java tooling for repository configuration checks. Seeking Cloud, SRE or Platform Engineering internships.

FEATURED ENGINEERING PROJECTS

AEGISOPS *Cloud Reliability & Observability Platform* **GitHub**
- Built a distributed control plane that performs concurrent service health checks, persists state transitions and incident timelines, and exposes Prometheus metrics and correlated OpenTelemetry traces across checkout, inventory and payment services.

Tech: Python, FastAPI, Next.js, PostgreSQL, Docker Compose, Prometheus, OpenTelemetry

NIMBUS *Redis-Protocol In-Memory Data Store* **GitHub**
- Implemented 32 Redis-compatible commands over RESP/TCP using a Java NIO reactor; added pipelining, TTL, append-only persistence, torn-write recovery, leader-follower replication and a 38-test suite.

Tech: Java, TCP, Java NIO, RESP, append-only persistence

CLOUDDOCTOR *Repository Configuration Auditor* **GitHub**
- Developed a dependency-free Java 21 CLI that inspects repository environment and Docker Compose configuration, builds deterministic facts, and reports rule-based findings with file/line evidence and CI-aware exit codes.

Tech: Java 21, CLI Development, Static Analysis, Docker Compose

VIBECONNECT *Anonymous Real-Time Video Platform* **GitHub**
- Built temporary user sessions and transactional matching with Supabase Realtime signaling, peer-to-peer WebRTC media and moderated in-call chat; camera and microphone media are not recorded or stored.

Tech: Next.js, TypeScript, Supabase, PostgreSQL, Realtime, WebRTC

RAGEBAIT *AI-Judged Competitive Battle Platform* **GitHub**
- Created timed debate and roast battles with transcript-aware local AI judging, explainable verdicts, contextual moderation, multilingual support, leaderboards and player progression; judging does not require external AI APIs.

Tech: Next.js, TypeScript, PostgreSQL, AI/NLP, Tailwind CSS

WEDXUI FIT *Explainable Fitness & Nutrition Platform* **GitHub**
- Built deterministic workout and nutrition planning engines with explainable recommendation traces, workout tracking, persisted user settings and account security features including TOTP two-factor authentication.

Tech: Next.js, TypeScript, Prisma, PostgreSQL, JWT, TOTP
